Internetworking with routers in CISCO packet tracer simulator.

AIM :

To design and configure a simple internetwork using a router in CISCO packet tracer and fast connectivity between two PC's.

PROCEDURE :

Step 1: Configure router 1

* Select the router and open CLI
* Press enter to start configuring router 1.
* Type enable to activate the privileged mode.

Step 2:

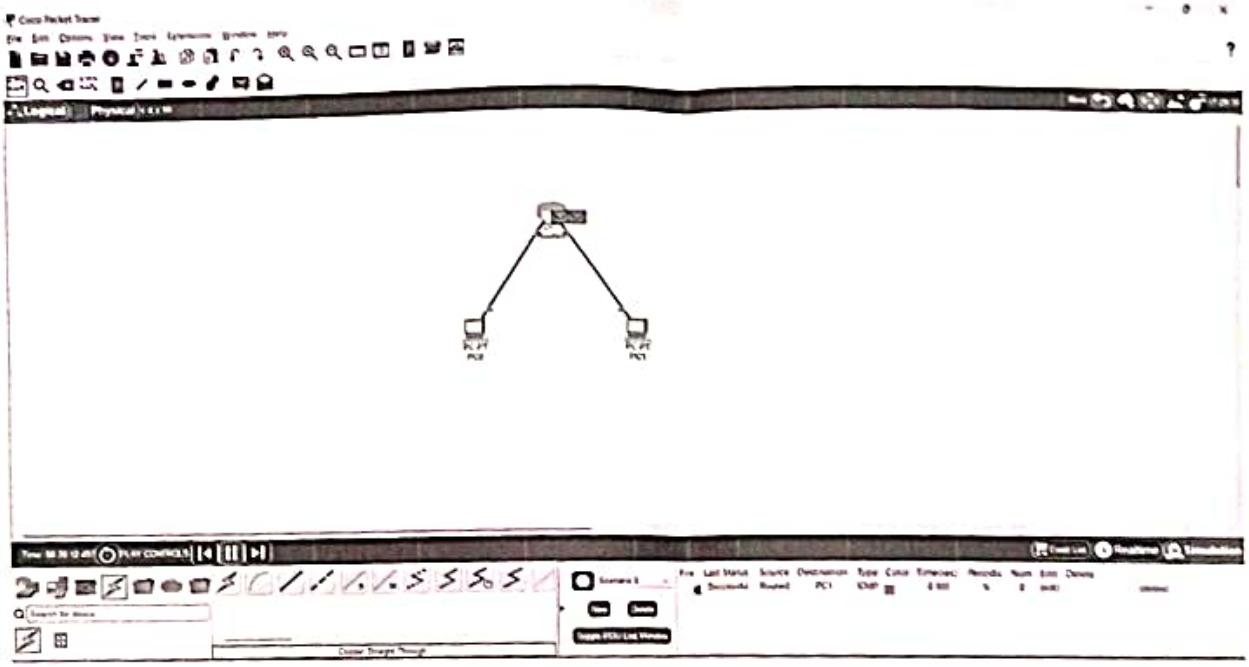

* Assign IP address to every PC in the network.
* Select the PC, Go to desktop and select IP configuration and assign IP address, default gateway, subnet mask.
* Assign the default gateway of PC's 192.168.10.1
* Assign the default gateway of PC as 192.168.20.1

Step 3:

* Connect fastethernet 0 port of PC0 with fastethernet 0/0 port of router 1 using a copper straight through

Cable.

EXP: 106 Design and configure an using wireless

using IP

RESULT:

Thus we designed and configured a simple internetwork using a router in cisco packet tracker.

successfully
designed and configured using a wireless router, DHCP server and Internet cloud and connectivity was successfully verified using ping cisco.com.
