EXP: 13 Implement your own ping program.

DATE: 9/10/26

AIM:

To implement a ping program using Python to check the connectivity of a host.

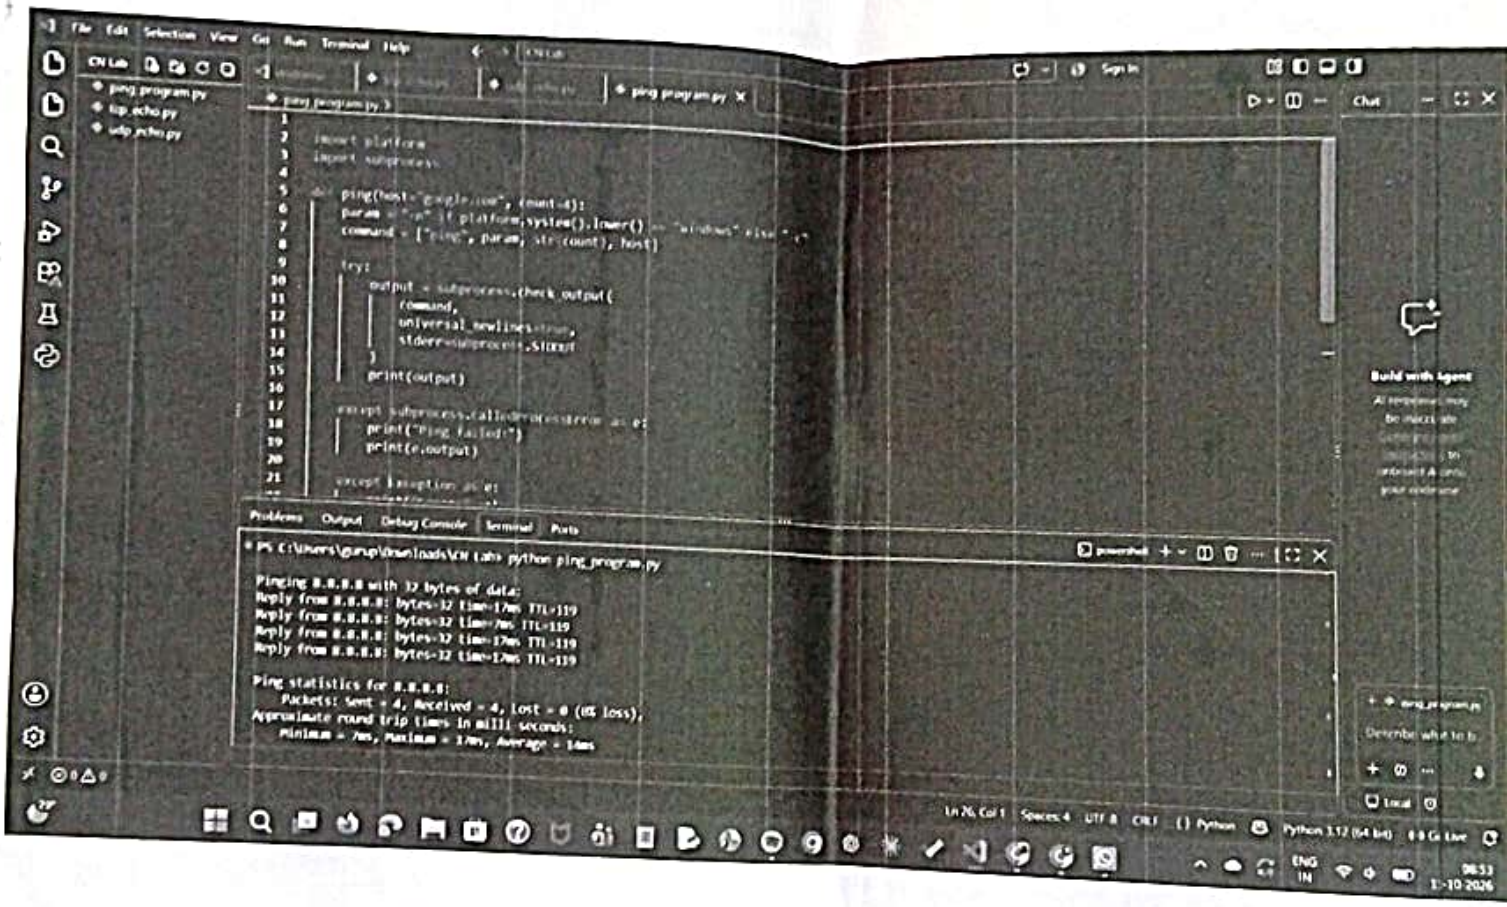

PROGRAM:

```
import platform
import subprocess
def ping(host = "google.com", count = 4):
    param = "-n" if platform.system().
lower() == "windows" else "-c"
    command = ["ping", param, str(count),
host]
    try:
        output = subprocess.check_output(
            command,
            universal_newlines = True,
            stderr = subprocess.STDOUT
        )
        print( output)
    except subprocess.CalledProcessError
as e:
        print("Ping failed:")
        print(e.output)
    except Exception as e:
        print("Error:", e)
```

__main__":
ping("8.8.8.8")

EXP : 14
DATE : 9/10/26

Write a code u

RESULT:

The ping program was implemented using python and executed to test network connectivity to a specified host.
